

## **DIGI-BIOFLASH- BIOMETRIC USB FINGERPRINT FLASH DISK**

### **Features :**

- BioFlash integrates with fingerprint for data security.
- Automatically removes previous images residue by software.
- Easy operation for fingerprint enrollment & matching.
- The core technology of high speed of digital conversion and classification(1:N)
- Instead of electronic (or semiconductor) fingerprint sensor, Bioflash use prism and image sensor which can solves the problem of ESD damage, scratch, contamination, and wear out.
- File or data encryption/decryption.

### **Specification**

- Dimension : 85\*24\*18(mm)
- Disk Memory Capacity : 64/128/256/512MB
- Fingerprint Capacity : 5 fingerprints maximum
- Fingerprint Sensor : Optical image Sensor
- Hardware Interface : USB1.1
- Allowable Rotation : -15/+15V
- Weight : 22g
