## DIGI-BioSECURE PIN & CAMERA TIME ATTENDANCE SYSTEM

### Pin & Camera Access Control & Attendance System

The DIGI-BioSecure now has a newer, more cost effective model on a highly secure platform that uses PIN as its only authentication token. This comes together with a built-in CMOS camera that takes a snapshot of every successful or rejected attempt. This supports from 1,000 users up to 30,000 users.

The benefits of using DIGI-BioSecure, as opposed to existing PIN systems, include higher level of security with the built-in CMOS camera, web based access, unit from different locations can be grouped up via TCP/IP network. DIGI-BioSecure can be monitored via the web and fraudulent entry can be avoided after office hours when ALL accesses to the premises is denied. Moreover, with a built-in CMOS camera (above the LCD screen), a snapshot of all attempts, including rejected attempts are stored within the database.

You now have control over the time periods or days to grant your employees access to the premises, which could be based on their time schedules and shifts. Also, ALL entries are logged by the system, which can hold up to 10,000 records.

### Benefits of using DIGI-BioSecure

- ✕ Security - with built-in CMOS camera and PIN as token of authentication.
- ✕ Accessibility - a network ready device accessible via any standard web browser.
- ✕ Flexibility - interconnect as many DIGI-BioSecure for easy synchronization.
- ✕ Ease of use - all software and hardware are built-in. DIGI-BioSecure is a simple Plug-and-Play device.
- ✕ Total control - all information can be downloaded from anywhere anytime.

**DIGI-BioSECURE PIN & CAMERA  
TIME ATTENDANCE SYSTEM**

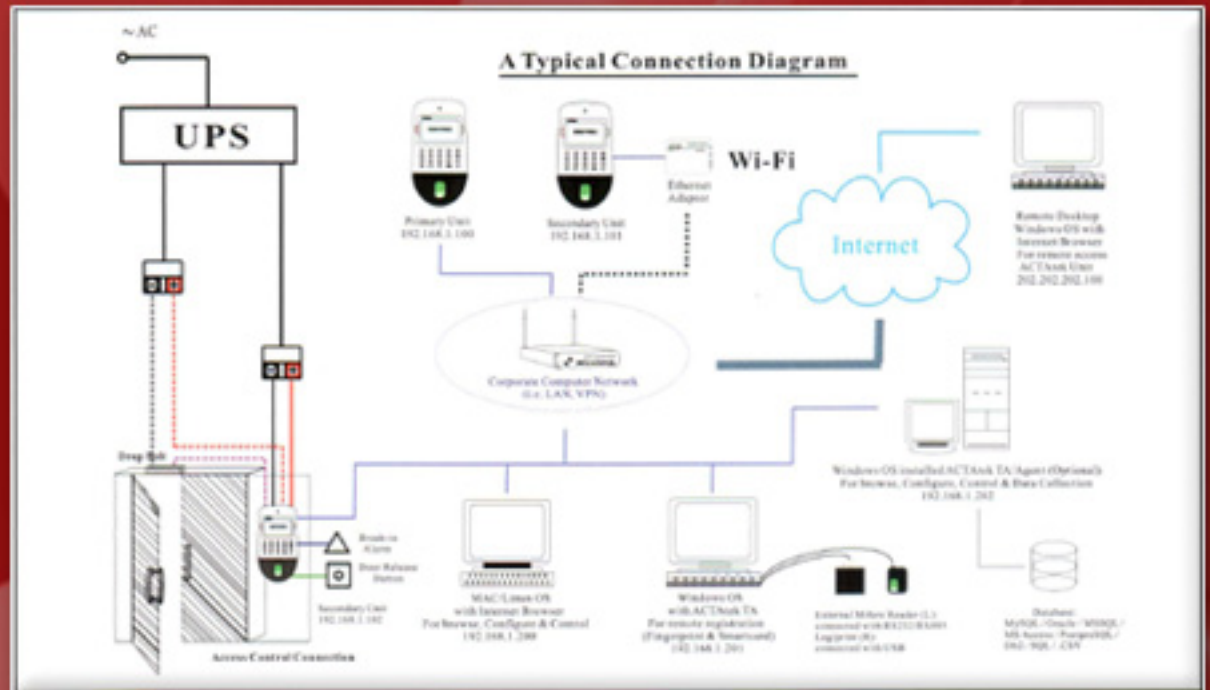

**Features & Benefits:**

- ✎ 1 Access method: PIN
- ✎ Operates in standalone or network modes
- ✎ Encrypted communication between units and browser
- ✎ All software and hardware are built-in
- ✎ IP65 rated weather and impact resistant casing
- ✎ Multi-lingual interface - supports English, Spanish, Chinese, Arabic, German, Thai, Korean, Polish, Portuguese and Croatian - More in future releases!
- ✎ Maximum user enrollment of 30,000 users
- ✎ Maximum transaction storage of 75,000 records
- ✎ Control, configure and administer via web interface
- ✎ Real-time system update and configuration
- ✎ Integration with Wiegand 26-bit and 40-bit output
- ✎ Optical built-in CMOS camera
- ✎ Optional Wi-Fi support
- ✎ Optional secure external relay

### Combination Tech Specifications

Features	Technical Specification
Image Resolution:	320 x 240 (default)
No. of Pictures Stored:	500
VGA Camera Resolution:	VGA 640 x 480
Lens Thickness:	1/4" double lens
Horizontal Viewing Angle:	49°
Vertical Viewing Angle:	38°
Zoom:	2x electronic zoom
Keypad Characters:	0-9, A-C
Authentication Method:	ID + PIN
